/ ABOUT

A **detail-oriented designer** who loves developing intuitive digital web experiences. Aiming to utilize experiences working in the health sector, in nursing, and fusing it with visual and technical creativity to solve product problems.

/ EXPERIENCE

Graphic & Web Designer, Dahdaleh Institute of Global Health Research (DIGHR)
October 2018 - June 2019

Created graphics, concepts, and other communication materials for Institution's branding and events. Redesigned and developed the UI of the website to increase site visitors.

Customer Technical Support, Naborly
Summer 2018

Analyzed patterns from client's technical inquires and proposed product improvements, including the UX/UI design for the app's user dashboard.

/ PROJECTS

Glucocheck (Personal Project)
Fall 2019

Created a diabetes blood glucose (BG) management tool for users to input and visually track BG levels. Built using front-end tools (HTML/CSS, and JavaScript) and back-end tools (PHP and MySQL).

Campus Eats (Personal Project)
Fall 2019

Designed and built an app catered to post-secondary students to find nearby food programs. With a goal to reduce food waste and improve nutrition for students. Utilized front-end (HTML/CSS, and JavaScript) and back-end (PHP and MySQL) tools.
